THE NRO STAFF

MEMORANDUM FOR DR. FLAX

25X1A6A

SUBJECT: Contractor Manpower Utilization at [REDACTED]

In furtherance of your June 10 memorandum to Mr. Sheldon and General Geary (Atch 1), a team of NRO Staff, NRO Comptroller, CIA, and Program D personnel surveyed the utilization of contractor manpower at [REDACTED] on June 20/21. A list of full-time team members is included as Atch 2.

25X1A6A

Each contractor who presently has 10 or more people assigned to [REDACTED] was reviewed (either as a contractor entity or as a participant in an overall functional activity) by a sub-group of the survey team. Individual reports on each such contractor and functional activity, plus an overall background/general information summary, are included as Atch 3.

25X1A6A

The findings of the various sub-groups generally indicate that the [REDACTED] contractors are operating effectively, and that present and projected manning levels seem reasonable in light of assigned missions and accompanying workloads. Further, it appears that most [REDACTED] activities have matured to the point where a fair degree of population stability can be anticipated for the future.
